

Meeting Agenda

Location: Linsen

Date: 2012-04-16

Time: 8:00

Facilitator: Felix Willebrand Westin

Participants: Jonathan Orrö, Niklas Andréasson, Niklas Logren

Objectives

Discuss how we should do testing.

Reports

Threading works.

Our mentor recommended us the Google Test testing framework.

Discussion items

Should we use Google Test? Exactly how do you write tests, anyway?

What should we test?

Outcomes and assignments

We decided to use GTest, since it seems to be the most used C++ testing framework. Did some research and decided that we should write tests for our model.

Wrap up

Goals for next meeting:

- Get GTest up and running.
